04/01/22	Update to error code text	Jason Wilborn	2.5
01/05/23	Add error code 218	Karan Dilawar	2.6

1. Overview

The Innovative Data Solutions XML Web Service 2.0 ("IDS WS 2.0") allows for the exchange of informational product requests and results between Innovative Data Solutions and its clients over the Internet.

1.1 IDS WS Requirements

In order to use this service, you will need the following:

- Have a valid Innovative Enterprises User ID and Password.
- Have this service enabled for your account. Contact your Account Representative at Innovative Enterprises for more information.
- Develop a solution that will send requests and process IEI response results as defined in this document.

Infinity Screening™ API users that wish to have changes posted to their server must create a receiving page that will accept posts from our server. More information about the receiving page is included in this document.

1.2 IDS WS URLs

1.21 SOAP URL

<https://xml.innovatedatasolutions.com/NatCrimWs/Search.asmx>

1.22 POST URLs

<https://xml.innovatedatasolutions.com/NatCrimWs/Search.asmx/PlaceOrder>

Place an order for an IDS product.

<https://xml.innovatedatasolutions.com/NatCrimWs/Search.asmx/GetStatus>

Retrieve status of an offline order.

<https://xml.innovatedatasolutions.com/NatCrimWs/Search.asmx/GetResults>

Retrieve results of an offline order.

<https://xml.innovatedatasolutions.com/NatCrimWs/Search.asmx/RemoveOrders>

Unenroll subjects from Infinity Screening™.

<https://xml.innovatedatasolutions.com/NatCrimWs/Search.asmx/ISEnrollBySearchToken>

Enroll subjects in Infinity Screening™ with a search-token from a prior search.

<https://xml.innovatedatasolutions.com/NatCrimWs/Search.asmx/ISUnEnrollBySearchToken>

Unenroll subjects from Infinity Screening with a search-token from a prior search.

<https://xml.innovatedatasolutions.com/NatCrimWs/Search.asmx/ISGetList>

Retrieve a list of subjects enrolled in Infinity Screening™.

<https://xml.innovatedatasolutions.com/NatCrimWs/Search.asmx/ISGetScreeningResults>

Retrieve the latest screening results for an Infinity Screening™ subject.

<https://xml.innovatedatasolutions.com/NatCrimWs/Search.aspx/ISGetLastComparison>

Retrieve the latest comparison markup from the last screening.

1.3 Testing IDS WS

Contact your sales rep when ready to test so they can setup an account.

1.4 Sending IDS Requests

Request

To send search requests, you will need to do the following:

- Create a PlaceOrder XML document with the required elements and attributes for the desired product. (Section 5.1.1).
- Post the XML document along with username and password to the PlaceOrder method (Section 1.2.1)

Response

You will immediately receive an IDS response document (Section 3.2) as a server response. Instant products will return completed results immediately.

Offline products will return a Pending status and can be picked up later using the GetStatus and/or GetResults methods or may be posted to a receiver URL hosted on your server (for select products only).

NOTE: All XML nodes may contain invalid XML characters returned as entities, e.g. "<" will be returned as "<".

2. Products

2.1.1 AssuredTenant™ Alias

To perform an AssuredTenant™ Alias search, you must provide a valid login and password. The “subject” section of your XML document must contain values for the “first name”, “last name”, and “ssn” fields.

Additionally, the subject section can contain an optional node named “aliases”. There can be a maximum of 10 additional alias nodes labeled “alias”. Below is a sample subject section:

```
<subject>
  <firstname>John</firstname>
  <middlename>Joe</middlename>
  <lastname>Doe</lastname>
  <ssn>123456789</ssn>
  <aliases>
    <alias>
      <firstname>John</firstname>
      <lastname>Do</lastname>
    </alias>
    <alias>
      <firstname>John</firstname>
      <lastname>Smith</lastname>
    </alias>
  </aliases>
</subject>
```

Additionally, the subject section can contain an optional node named “address1”. The “address1” node must contain child nodes named as follows:

“buildingnum” – Can contain the house / building number or a PO Box number. Must be a number between 0 and 999999.

“streetname” – The name of the street. Set the value to “PO BOX” if the address is for a PO Box. Note: the buildingnum field must not be empty for a PO Box address.

“city”

“state”

“zip”

There can be a maximum of 2 additional address nodes labeled “address2” and “address3”.

Below is a sample subject section:

```
<subject>
  <firstname>John</firstname>
  <middlename>Joe</middlename>
  <lastname>Doe</lastname>
  <ssn>123456789</ssn>
  <address1>
    <buildingnum>456</building>
    <street name>Any St.</street name>
    <city>Any Town</city>
    <state>CA</state>
    <zip>12345</zip>
  </address1>
</subject>
```

AssuredTenant™ Alias version 1.0 and 1.1:

If there is a hit on an alias, the response will contain an aliashits node like below inside the evictioninformation node.

```
<aliashits>
- <aliashit>
  <firstname>JOHN</firstname>
  <lastname>SMITH</lastname>
</aliashit>
</aliashits>
```

AssuredTenant™ Alias version 2.0:

When searching using AssuredTenant Alias version 2.0, we will perform separate searches for each alias name included, any additional aliases found and then combine all the results into one report with the hit information included.

3. Service Methods

3.1.1 PlaceOrder

3.1.2 PlaceOrder Parameters

Name	Data Type	Max Length	Description
Login	Int	20	Your Innovative Account ID
Password	String	20	You Innovative Account password
inputXML	String	N/A	Input XML Document

3.2.1 inputXML Document

The inputXML document is a string formatted to the ieirequest schema (refer to Section 4). Sample XML request and response documents should be provided along with this document.

3.2.2 Subject Parameters Summary

Name	Data Type	Max Length	Description	NCIS™
First name	String	50	First name of person being searched	O
Middle name	String	50	Middle name of person being searched	O
Last name	String	65	Last name of person being searched	X
ssn	String	11	SSN being searched for in the format XXX-XX-XXXX	X
dob	String	10	Date of Birth for person being searched for in the format MM/DD/YYYY	X
address	String		Address of person being searched	O
city	String		City to search in	O
state	String	2	State to search in. If left blank, a nationwide search will be performed	O
zip	String	5	Zipcode to search in.	O
				X = REQUIRED O = OPTIONAL

4. ieirequest Schema

ieirequest

Elements and Attributes	Description
ieirequest	The root element for the PlaceOrder XML document
ieirequest/ order	A container for the order within the ieirequest.

order

Elements and Attributes	Description
ieirequest/ order	The root element of the order.
ieirequest/ order/ quoteback	Your reference string for this order. Max 40 characters
ieirequest/ order/ profilename	The profile name to use for this order. If no element is provided, the default profile will be used.
ieirequest/ order/ subject	A container for subject data.
ieirequest/ order/ product	Container for product specific data.
ieirequest/ order/ options	Specific options for medical suite orders.
ieirequest/ order/ enrollis	Flag to indicate that the subject should be enrolled in Infinity Screening™.

subject

Elements and Attributes	Description	Data Type	Usage	Frequency
ieirequest/ order/ subject	Root element for all input data	Complex	Required	1
ieirequest/ order/ subject/ firstname	First name sent in the request	string	Required	1
ieirequest/ order/ subject/ middlename	Middle name sent in the request	string	Optional	0 – 1
ieirequest/ order/ subject/ lastname	Last name sent in the request	string	Required	1
ieirequest/ order/ subject/ ssn	SSN sent in the request	string	Required	1
ieirequest/ order/ subject/ dob	DOB sent in the request. The dob node contains the data in month, day and year attributes.	String	Optional	0 – 1
ieirequest/ order/ subject/ aka	Comma separated list of aliases	string	Optional	0 – 1
ieirequest/ order/ subject/ address1	Root element of the address fields	Complex	Optional	1

ieirequest/ order/ subject/ address1/ buildingnum	The building number of the address or a PO Box number. Must be a number between 0 and 999999.	string (allows for future change of allowing alpha-character s. If number is put in with a special character ex. 160-10 then system will put 160 as building number and add 10 to streetname)	Required	1
ieirequest/ order/ subject/ address1/ streetname	The street name in the address. Enter text "PO BOX" (sans quotes) in this field if the address is for a PO Box. Note: buildingnum must have a value for a PO Box address.	string	Required	0 – 1
ieirequest/ order/ subject/ address1/ city	Address city of subject	string	Required	1
ieirequest/ order/ subject/ address1/ state	Address state of subject	string	Required	1

ieirequest/ order/ subject/ address1/ zip	Address zip code of subject	string	Required	1
ieirequest/ order/ subject/ address2	Root element of the address fields	Complex	Optional	0 - 1
ieirequest/ order/ subject/ address2/ buildingnum	The building number of the address or a PO Box number. Must be a number between 0 and 999999.	string (allows for future change of allowing alpha-character s. If number is put in with a special character ex. 160-10 then system will put 160 as building number and add 10 to streetname)	Required	1
ieirequest/ order/ subject/ address2/ streetname	The street name in the address. Enter text "PO BOX" (sans quotes) in this field if the address is for a PO Box. Note: buildingnum must have a value for a PO Box address.	string	Required	0 – 1

ieirequest/ order/ subject/ address2/ city	Address city of subject	string	Required	1
ieirequest/ order/ subject/ address2/ state	Address state of subject	string	Required	1
ieirequest/ order/ subject/ address2/ zip	Address zip code of subject	string	Required	1
ieirequest/ order/ subject/ address3	Root element of the address fields	Complex	Optional	0 - 1
ieirequest/ order/ subject/ address3/ buildingnum	The building number of the address or a PO Box number. Must be a number between 0 and 999999.	string (allows for future change of allowing alpha-character s. If number is put in with a special charater ex. 160-10 then system will put 160 as building number and add 10 to streetname)	Required	1

ieirequest/ order/ subject/ address3/ streetname	The street name in the address. Enter text "PO BOX" (sans quotes) in this field if the address is for a PO Box. Note: buildingnum must have a value for a PO Box address.	string	Required	0 – 1
ieirequest/ order/ subject/ address3/ city	Address city of subject	string	Required	1
ieirequest/ order/ subject/ address3/ state	Address state of subject	string	Required	1
ieirequest/ order/ subject/ address3/ zip	Address zip code of subject	string	Required	1
ieirequest/ order/ subject/ aliases	Aliases of subject	Complex	Optional	0-1

aliases

Elements and Attributes	Description	Data Type	Usage	Frequency
ieirequest/ order/subject/ aliases/ alias	Root element of order.	Complex	Required	1
ieirequest/ order/subject/ aliases/ alias/ firstname	First name of alias	String	Required	1
ieirequest/ order/subject/ aliases/ alias/ middlename	middle name of alias	String	Required	1
ieirequest/	Last Name of	String	Required	1

order/subject/ aliases/ alias/ lastname	alias			
---	-------	--	--	--

product

Elements and Attributes	Description	Data Type	Usage	Frequency
ieirequest/ order/ product	Root element of order.	Complex	Required	1
ieirequest/ order/ product/ assuredtenantalias	AssuredTenant Alias product type	Complex	Optional	0 – 1
ieirequest/ order/ <productname>/ settings/ additionaladdresses	Flag to determine the amount of additional addresses to check. Default value is 3	String	Optional Options include: 1, 2, 3, 4, 5, 6, 7, 8, 9	0-1
ieirequest/ order/ <productname>/ settings/ excludenoticetypes	Setting that excludes records that have the specified notice type.	string	Optional pipe-delimited field Options: See Addendum C	Text
ieirequest/ order/ <productname>/ settings/ additionalaliases	Flag to determine the amount of additional aliases to check. Default value is 3	String	Optional Options include: 1 - 30	0-1

settings

Some products have settings that can be overridden by using the following XML parameters. Settings are able to control different aspects of the search to give a more detailed or less detailed report.

ieirequest/ order/ <productname>/ settings	Root element of settings.	Complex	Optional	0-1
--	------------------------------	---------	----------	-----

5. ieiresponse Schema

ieiresponse

Elements and Attributes	Description
ieiresponse	Root element
ieiresponse/ requestinformation	The data items that were sent in the request or any errors that occurred. See section 5.1
ieiresponse/ addressinformation	Container element for all of the records containing address information. See section 5.2
ieiresponse/ evictioninformation	Container element for AssuredTenant™ information. See section 5.3
ieiresponse/ quoteback	The quoteback value will be reported back here.
ieiresponse/ disclaimer_link	The IEI criminal records disclaimer. Will appear in all responses on 01/12/15 and thereafter. Contains general disclaimer text and includes a link to an external disclaimer URL.

1.1 requestinformation

Elements and Attributes	Description
ieiresponse/ requestinformation	Root element
ieiresponse/ requestinformation/ @code	Response code
ieiresponse/ requestinformation/ code message	Message to go along with the Response Code
ieiresponse/ requestinformation/ inputs	Container for input data

1.2 evictioninformation

Elements and Attributes	Description	Data Type	Usage	Frequency
ieiresponse/ evictioninformation	Root element. Information about eviction/property damage case information			
ieiresponse/evictioninformation/ message	SSN information. Indicates the validity of the of the SSN, and the state of issue	String	Optional	0 - 1
ieiresponse/evictioninformation/ year	SSN information. The year of issue for a valid SSN.	String	Optional	0 - 1

ieiresponse/evictioninformation/ alias hits	Alias hits information.	String	Complex	0 - 1
ieiresponse/evictioninformation/records/ @count	The number of eviction records	String	Optional	0 - 1
ieiresponse/evictioninformation/records/ record	Root element. Contains eviction court record		Optional	0 - 1
ieiresponse/evictioninformation/records/record/ firstname	The first name of the defendant	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ middle name	The middle name of the defendant	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ lastname	The last name of the defendant	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ address	The address of the residence	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ city	The city of the residence	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ state	The state of the residence	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ zip	The zip code of the residence	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ caseno	The court case number	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ filingdate	The date that the case was filed	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/	The judgement awarded	String	Optional	0 - 1

judgement				
ieiresponse/evictioninformation/records/record/ disposition	The disposition	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ judgementamount	The amount of the judgement awarded	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ plaintiff	The name of the plaintiff	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ noticetype	Description of the record/offense	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ judgementdate	Date of judgement	String	Optional	0 - 1
ieiresponse/evictioninformation/records/record/ court	The name of the court where the record was filed	String	Optional	0 - 1

inputs

Elements and Attributes	Description	Data Type	Usage	Frequency
ieireponse/ requestinformatio n/ inputs	Root element	Complex	Required	1
ieireponse/ requestinformatio n/ inputs/ firstname	First name sent in the request	String	Optional (required for AssuredTenant™)	0 – 1
ieireponse/ requestinformatio n/ inputs/ middlename	Middle name sent in the request	String	Optional	0 – 1
ieireponse/ requestinformatio n/ inputs/ lastname	Last name sent in the request	String	Optional (required for AssuredTenant™)	0 – 1
ieireponse/ requestinformatio n/ inputs/ ssn	SSN sent in the request	String	Optional (required for AssuredTenant™)	0 – 1
ieireponse/ requestinformatio n/ inputs/ dob	DOB sent in the request. The dob node contains the data in year, month, and day attributes.	String	Optional	0 – 1
ieireponse/ requestinformatio n/ inputs/ state	State sent in the request	String	Optional	0 – 1
ieireponse/ requestinformatio n/ inputs/ product	Product sent in the request	String	Required	1
ieireponse/ requestinformatio n/	Quoteback value sent in the request	String	Optional	0 – 1

inputs/ quoteback				
ieireponse/ requestinformatio n/ inputs/ additional addresses	Additional Address value sent in the request	String	Optional	0 - 1
ieireponse/ requestinformatio n/ inputs/ additional aliases	Additional Aliases value sent in the request	String	Optional	0 - 1
ieireponse/ requestinformatio n/ inputs/ excludeno ticetypes	Exclude Notice Types value sent in the request	String	Optional	0 – 1
ieireponse/ requestinformatio n/ inputs/ assuredte nantversion	Assured Tenant Version value sent in the request	Must be either 1.0 or 1.1	Optional	0 – 1
ieireponse/ requestinformatio n/ inputs/aliases/alia s/ firstname	Alias First Name value sent in the request	String	Optional	0 - 1
ieireponse/ requestinformatio n/ inputs/aliases/alia s/ lastname	Alias Last Name value sent in the request	String	Optional	0 - 1
ieireponse/ requestinformatio n/ inputs/ timestamp	Auto generated timestamp	String	Required	1

Summary information

Elements and Attributes	Description	Data Type	Usage	Frequency
----------------------------	-------------	--------------	-------	-----------

ieiresponse/ addressinformation/ summaryinformation	Root element	Complex	Optional	1
ieiresponse/ addressinformation/ summaryinformation/ uniquedobs	Element for dob records	Complex	Required if summary information node exists	1
ieiresponse/ addressinformation/ summaryinformation/ uniquedobs/ @count	Number of dob nodes returned	Integer	Required if unique dobs node exists	1
ieiresponse/ addressinformation/ summaryinformation/ uniquedobs/ dob	dob	String	Required if unique dobs node exists	
ieiresponse/ addressinformation/ summaryinformation/ uniquenames	Element for full name records	Complex	Required if summary information node exists	1
ieiresponse/ addressinformation/ summaryinformation/ uniquenames/ @count	Number of fullname nodes returned	Integer	Required if unique names node exists	1
ieiresponse/ addressinformation/ summaryinformation/ uniquenames/ fullname	fullname	String	Required if unique names node exists	
ieiresponse/ addressinformation/	Element for county	Complex	Required if summary	1

summaryinformation/ uniquecounties	records		information node exists	
ieiresponse/ addressinformation/ summaryinformation/ uniquecountiess/ @count	Number of county nodes returned	Integer	Required if unique counties node exists	1
ieiresponse/ addressinformation/ summaryinformation/ uniquecounties/ county	County	String	Required if unique counties exists	
ieiresponse/ addressinformation/ summaryinformation/ distinctaddresscount	Number of distinct addresses found	Integer	Required if summary information node exists	1

records

Elements and Attributes	Description	Data Type	Usage	Frequency
ieiresponse/ addressinformation/ records	Root element	Complex	Required if address information node exists	1
ieiresponse/ addressinformation/ records/ @count	Number of record nodes returned	Integer	Required if records node exists	1
ieiresponse/ addressinformation/ records/ record	Element for address record	Complex	Required if records node exists	1 - 1000

record

Elements and Attributes	Description	Data Type	Usage	Frequency
ieireponse/ addressinformation/ records/ record/ fullname	The full name returned on the record	String	Optional	0 - 1
ieireponse/ addressinformation/ records/ record/ firstname	The first name returned on the record	String	Optional	0 - 1
ieireponse/ addressinformation/ records/ record/ middlename	The middle name returned on the record	String	Optional	0 - 1
ieireponse/ addressinformation/ records/ record/ lastname	The last name returned on the record	String	Optional	0 - 1
ieireponse/ addressinformation/ records/ record/ suffix	The suffix returned on the record	String	Optional	0 - 1
ieireponse/ addressinformation/ records/ record/	The first name returned on the record for ACE™ Searches only	String	Optional	0 - 1

nameparts/ firstname				
ieiresponse/ addressinformation/ records/ record/ nameparts/ middlename	The middle name returned on the record for ACE™ Searches only	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ nameparts/ lastname	The last name returned on the record for ACE™ Searches only	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ nameparts/ suffix	The suffix returned on the record for ACE™ Searches only	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ fulldob	The full date of birth returned on the record	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ dob	The date of birth returned on the record. The dob node contains the data in year, month, and day attributes.	String	Optional	0 - 1

ieireponse/ addressinformation/ records/ record/ ssn	The SSN returned on the record	String	Optional	0 - 1
ieireponse/ addressinformation/ records/ record/ age	The age returned on the record	String	Optional	0 - 1
ieireponse/ addressinformation/ records/ record/ age-at-death	The age at death returned on the record	String	Optional	0 - 1
ieireponse/ addressinformation/ records/ record/ death-verification-code	The death verification code returned on the record	String	Optional	0 - 1
ieireponse/ addressinformation/ records/ record/ aliases	Element for aliases	Complex	Optional	0 - 1
ieireponse/ addressinformation/ records/ record/ addresses	Element for addresses	Complex	Optional	0 - 1
ieireponse/ addressinformation/ records/	Element for phonenumbers	Complex	Optional	0 - 1

record/ phonenumbers				
--------------------------------	--	--	--	--

aliases

Elements and Attributes	Description	Data Type	Usage	Frequency
ieiresponse/ addressinformation/ records/ record/ aliases	Root element	Complex	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ aliases/ @count	Number of alias nodes	Integer	Required if aliases node exists	1
ieiresponse/ addressinformation/ records/ record/ aliases/ alias	Element for alias	Complex	Required if aliases node exists	1 - ∞

alias

Elements and Attributes	Description	Data Type	Usage	Frequency
ieiresponse/ addressinformation/ records/ record/	Root element	Complex	Required if aliases node exists	1 - ∞

aliases/ alias				
ieiresponse/ addressinformation/ records/ record/ aliases/ alias/ fullname	Full alias name	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ aliases/ alias/ firstname	Alias first name	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ aliases/ alias/ middlename	Alias middle name	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ aliases/ alias/ lastname	Alias last name	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ aliases/ alias/ lastsuffix	Alias suffix	String	Optional	0 - 1

record/ aliases/ alias/ suffix				
ieiresponse/ addressinformation/ records/ record/ aliases/ alias/ fulldob	Full alias date of birth	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ aliases/ alias/ dob	Alias date of birth. Dob node contains the data in year, month, and day attributes	String	Optional	0 - 1

addresses

Elements and Attributes	Description	Data Type	Usage	Frequency
ieiresponse/ addressinformation/ records/ record/ addresses	Root element	Complex	Optional	0 - 1
ieiresponse/ addressinformation/ records/	The number of address nodes	Integer	Required if addresse	1

record/ addresses/ @count			s node exists	
ieiresponse/ addressinformation/ records/ record/ addresses/ address	Element for address	Complex	Required if addresses node exists	1 - ∞

address

Elements and Attributes	Description	Data Type	Usage	Frequency
ieiresponse/ addressinformation/ records/ record/ addresses/ address	Root element	Complex	Required if addresses node exists	1 - ∞
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ fullstreet	The entire street line of the address record	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ streetnumber	The street number of the address record	String	Optional	0 - 1

street-number				
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ street-pre-direction	The pre direction of the street for the address record	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ street-name	The street name of the address record	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ street-post-direction	The post direction of the street for the address record	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ street-suffix	The suffix of the street name of the address record	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/	The unit number of the address record	String	Optional	0 - 1

addresses/ address/ unit-number				
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ city	The city of the address record	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ state	The state of the address record	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ zip	The zip code of the address record	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ zip4	The four digit postfix of the zip code of the address record	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ zip4	The county of the	String	Optional	0 - 1

records/ record/ addresses/ address/ county	address record			
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ verified	Whether or not the address has been verified	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ from-date	The first reported date the offender lived in this address. The data is returned in year, month, and day attributes.	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ addresses/ address/ to-date	The last reported date the offender lived in this address. The data is returned in year, month, and day attributes.	String	Optional	0 - 1

phonenumbers

Elements and Attributes	Description	Data Type	Usage	Frequency
ieiresponse/ addressinformation/ records/ record/ phonenumbers	Root element	Complex	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ phonenumbers/ @count	Number of phone number elements	Integer	Required if phone numbers node exists	1
ieiresponse/ addressinformation/ records/ record/ phonenumbers/ phonenumber	Element for phone number	Complex	Required if phone numbers node exists	1 - ∞

Phone number

Elements and Attributes	Description	Data Type	Usage	Frequency
ieiresponse/ addressinformation/ records/ record/ phonenumbers/ phonenumber	Root element	Complex	Required if phone numbers node exists	1 - ∞
ieiresponse/	The full phone	String	Optional	0 - 1

addressinformation/ records/ record/ phonenumber/ phonenumber/ fullnumber	number on the record			
ieiresponse/ addressinformation/ records/ record/ phonenumber/ phonenumber/ areacode	The area code on the record	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ phonenumber/ phonenumber/ listed	Whether or not the phone number is listed	String	Optional	0 - 1
ieiresponse/ addressinformation/ records/ record/ phonenumber/ phonenumber/ firstname	The first name for the phone number on the record	String	Optional	0 - 1
